

SAHIL KUMAR

Data Analytics Enthusiast | B.Tech CSE Student

Dehradun, Uttarakhand | +91 7319899379 | sahilkumar620409@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Third-year Computer Science Engineering student with hands-on data analysis experience in Python. Completed a Data Analysis internship at Cognifyz Technologies, applying pandas, seaborn, and SciPy to extract actionable insights from real-world datasets. Skilled in statistics, SQL, and data visualization, with core programming foundations in C, C++, and Java. Seeking a Data Analytics / Data Science internship to bring analytical rigor and problem-solving to real business challenges.

EDUCATION

Tula's Institute, Dehradun

2024 – 2028

B.Tech in Computer Science Engineering | CGPA: 7.1 / 10 (improved from 6.0 in Year 1)

INTERNSHIP EXPERIENCE

Data Analysis Intern — Cognifyz Technologies

Remote

- **Built end-to-end Python analysis pipelines** (level2_analysis.py, level3_analysis.py) to process a Zomato-style restaurant dataset using pandas, SciPy, seaborn, and itertools.
- **Performed exploratory analysis** on restaurant ratings distribution, popular cuisine combinations, and geographic patterns to surface actionable trends across locations.
- **Engineered chain-detection logic** and studied statistical correlations between price range and service quality metrics.
- **Produced and interpreted data visualizations** to communicate findings in a clear, business-friendly format for non-technical stakeholders.
- **Resolved cross-platform execution issues** (macOS/Windows), ensuring scripts ran reliably across environments.

PROJECTS

Zomato Restaurant Data Analysis — Python, Pandas, Seaborn, SciPy

- Extended the Cognifyz internship analysis independently, surfacing ratings trends, cuisine patterns, and price-vs-service insights; documented and published on GitHub.

GitHub: github.com/sahilkumar620/zomato-restaurant-data-analysis

Superstore Sales & Profitability Analysis — Python, Pandas, Matplotlib, Seaborn

- Analyzed 3+ years of retail transaction data to uncover sales and profit trends across categories, regions, and customer segments.
- Identified loss-making sub-categories and quantified the discount-vs-profit relationship using correlation analysis and visual dashboards.

Dashboard: datastudio.google.com/s/sYqoE_iFQoY | GitHub: github.com/sahilkumar620/superstore-sales-analysis

HR Employee Attrition Analytics Dashboard — Google Looker Studio, SQL-style Calculated Fields

- Built an interactive Looker Studio dashboard analyzing 1,400+ employee records to identify key drivers of attrition across departments, age groups, and income levels.
- Created calculated fields (attrition rate, avg. satisfaction, headcount by department) to recommend data-driven retention strategies for high-risk segments.

Dashboard: datastudio.google.com/s/h8-3UIfMISl | GitHub: github.com/sahilkumar620/hr-attrition-dashboard

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL, HTML

Data Analysis & Visualization: pandas, NumPy, SciPy, seaborn, matplotlib, Excel, Google Looker Studio

Tools: Git, GitHub, Jupyter Notebook, VS Code

Concepts: Statistical Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Database Design

CERTIFICATIONS

- NPTEL Java Elite Silver Medal — Scored 88%
- CodeAlpha Data Analytics Internship — EDA, Data Visualization & Sentiment Analysis
- CODSOFT Certification
